16 Company profile

**A lot of experience**

The plant construction company GST from Villingen provides much more knowledge in the fields of preparation, steam and cooling systems than it can be assumed due to the relatively short market presence.

**The German Heavy Technology (GHT) was founded in July 1989 in Villingen. The plant was chosen for a reason: before the current managing partner Wolfgang Pöhl, he had worked for many years in the power plant industry. He brought with him a lot of practical knowledge for all relevant areas. Together with his partner, Peter Pöhl, who has withdrawn from the company management, he has built up a strong, experienced team with a lot of technical and engineering knowledge. In the beginning, the company was mainly active in the field of steam and cooling systems. After the year 2000, the company was able to expand its range of services to the preparation of steam and cooling systems. The company's managing director, Wolfgang Pöhl, is leading a team of 20 employees, which consists of 17 persons are working in the company's own design department. In the field of technical and industrial engineering, the company has a long tradition of knowledge. In the past, the company has been able to gain experience in the field of steam and cooling systems. The company's managing director, Wolfgang Pöhl, is leading a team of 20 employees, which consists of 17 persons are working in the company's own design department. In the field of technical and industrial engineering, the company has a long tradition of knowledge. In the past, the company has been able to gain experience in the field of steam and cooling systems.**

**Preparation**

One of GST's key areas of business activity is the preparation of steam and cooling systems, which are used in a wide range of industrial processes. The company's managing director, Wolfgang Pöhl, is leading a team of 20 employees, which consists of 17 persons are working in the company's own design department. In the field of technical and industrial engineering, the company has a long tradition of knowledge.
