A lot of experience

The plant construction company GBT from Villingen provides much more knowledge in the field of preparation, system and cooling systems than it can be assumed due to the relatively short market presence.

The German Battery Technology (GBT) was founded in July 1980 in Villingen. The plant was chosen for a reason: because the current managing partner, Wolfgang Pöhl, has his roots in the company. Pöhl has been one of the most successful producers of a professional product range of plants for all types of plants. Together with his partner, Peter Pöhl, who has obtained from the company management, he has built up a company, which is now a leading company in the field of battery technology. The company's managing director, Peter Pöhl, is a leading expert in the field of battery technology. He has been managing the company since 1980. The company's managing director, Peter Pöhl, is a leading expert in the field of battery technology. He has been managing the company since 1980. The company's managing director, Peter Pöhl, is a leading expert in the field of battery technology. He has been managing the company since 1980.

Over 30 years of experience in the field of battery technology. The company's managing director, Peter Pöhl, is a leading expert in the field of battery technology.
