Two long moulders for a toast bread line

2020-10-08 07:37

The two long rollers will be sent after a successful test run.
They complement a toast bread line with an hourly output of 6.000 pieces. To do this, you need long moulders which, even in multi-shift operation under full load, repeatedly produce the highest and consistent product quality. Long moulders from GBT.

Our loyal customer in Germany knows this and has relied on GBT again.
The GBT team thanks you and wishes you continued success.
